Gualala, CA 95445-1056

The National Registry of Emergency Medical Technicians (NREMT) Emergency Medical Responder (EMR) course prepares the student to provide nationally recognized certified emergency care for patients of all ages with a variety of medical conditions and traumatic injuries in the pre-hospital setting. Learn hands-on medical skills, interventions and applications of emergency medical equipment. This course is recommended as preparatory for Emergency Medical Technician (EMT) training and coursework and is often required for fire department positions. This is also a great entry-level course to introduce students to medical careers or for people interested in helping others.
